

ADD PLUS Plus Bench Series

The ADD PLUS Bench Series concept is based on Tetris blocks that can be combined in a variety of different ways.

There are three different modules: a T-shaped module with one single backrest, an S-shaped module with two backrests – and then a small module. The T-module and the small module are available with an integrated planter box. The possibility of combining the three modules in different ways allows you to create your own unique bench, with exactly the look you are aiming for in your outdoor space.

The benches face neither one way nor the other: ADD PLUS is a bench to see and enjoy from every side. You can lean up against the backrest, sling your legs over the bench, or even sit up on the backrest if you choose.

The end panels of the ADD PLUS modules are finished in 4 mm stainless steel plates. If you wish, the plate can be powder-coated in the colour of your choice.

The legs are made of galvanised square pipe, and the ADD PLUS bench is designed to be embedded in concrete.

The ADD PLUS bench is covered in mahogany, which provides an attractive contrast to the end panel.

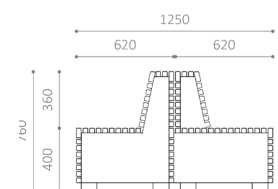

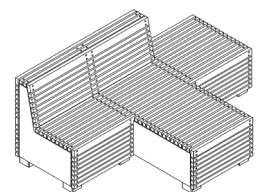

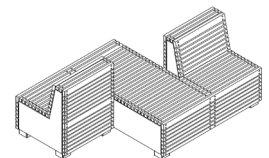

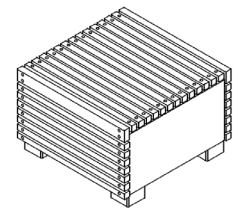

Materials

Frame: Hot-dip galvanised steel; Powder Coated Hot-dip galvanised steel

Seat: Untreated FSC®-certified mahogany

Dimensions

B: 620 - 1250 mm
W: 620 - 1860 mm
H: 400 - 755 mm
