VELOSTAZIONE

THE MANIFESTO OF A SUSTAINABLE *STILE*

Thanks to the creative process started since its establishment in 1984, Metalco has become the world leader in manufacturing solutions and products for the high-impact urban spaces and smart city projects, aimed at bringing immediate benefits to people who use them.

WE PROMOTE SOCIALITY because there is no well-being without personal connections.

WE OBSERVE REAL LIFE starting by listening to individual in order to understand the entire community.

WE INSTILL A SENSE OF BELONGING so that every person can feel safe and welcome not just at home, but also in all collective spaces, in their own cities and around the world.

WE CARE ABOUT THE ENVIRONMENT because it is a precious resource that must be protected. With our products and processes, we help to make street furniture projects around the world more sustainable.

WE LOVE DESIGN AND CREATIVE FREEDOM because only by combining them we can turn street furniture into

Social Design for Real Life.

WE DO ALL OF THIS AND WE DO IT WITH *STILE*.

A NEW ELEMENT FOR CITY LIFE

As our societies try to move towards an increasingly sustainable way of life, a cleaner alternative to car commuting is catching on: the bicycle. This solution offers benefits on several levels: it is an economical and environmental option and helps people achieve health and fitness goals.

However, a cyclist must be able to find a place to park and store it effectively, efficiently and safely. Bike parking, therefore, becomes essential both for the proper functioning of any cycling program, especially in high-density areas and to restore the city its decor and its beauty.

The parking station for bicycles thus support sustainable mobility. In fact, if positioned in strategic spaces, such as main hubs and boarding points or entrances to stores and shopping centers, they are a useful tool to facilitate the order and organization of public places.

metalco

COMMUNITY

Bicycles parked in a disorderly manner damage the public image and create situations of obstruction and confusion, occupying platforms and damaging trees and street furniture.

Thanks to Garda, it is possible to ensure order and organization in the city.

INDIVIDUAL

Short term place to leave bikes during activities or errands.

Long-term place to leave bicycles at work or at home.

Safety.

Comfort.

A successful community is committed to create efficient bicycle parking solutions for cyclists in the short and long term.

This is why Metalco has designed a modular parking station for bicycles that can be composed according to the characteristics of the place of destination.

In order to have no limits in positioning, the modular elements of GARDA can be combined both on the long side and on the short side.

GARDA V

Modular parking station consisting of a structure in galvanized and powder coated tubular steel, and equipped with a powder coated steel sheet cover. The structure is equipped with plates for fixing to the ground with anchors (not included). Each module is equipped with LED lighting and is closed laterally by expanded metal sheet panels or decorated metal sheet panels and equipped with an access door, whose closure is protected by a customizable access control system. Available in several versions, with or without flooring in WPC boards or concrete slabs; each module is equipped with a pair of bike racks (to be chosen between two models) and a series of accessories, such as electric charging bar or helmet lockers. The horizontal cover can be set up to accommodate a green roof (not included).
