

## KLARA PL D Double Sided Wooden Bench

The KLARA series features a selection of attractive benches with a simple and clean design.

The bench consists of a single steel frame, where the broad front edge contrasts nicely with the wood, emphasising modern design.

The seat and backrest (optional) are made of wood.

No matter which colour frame or type of wood you choose, KLARA will always be a classic and elegant addition to any urban space.

KLARA is comfortable, the curved edges on the side and back sections are extremely user-friendly and contribute to the product's strong identity. A detachable armrest for the disabled is available (optional).

KLARA features slender legs with an extremely sturdy construction made of hot-dip galvanised steel.

Steel is tough material and, when it is hot-dip galvanised, gives the product an extremely durable surface, meaning it requires a minimum amount of maintenance. At the same time, hot-dip galvanisation expands lifetime considerably longer than it would have been if left untreated.

The KLARA Bench is available with Kebony Clear slats, which is a healthy wood that wears well and requires a minimum of maintenance. You can also choose the bench in FSC®-certified mahogany, either oil-treated or untreated.

Whatever type of wood you choose, you'll get a bench that lasts for years and requires a minimum of maintenance.

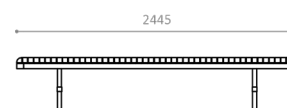

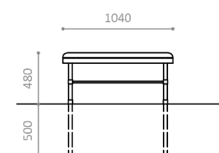

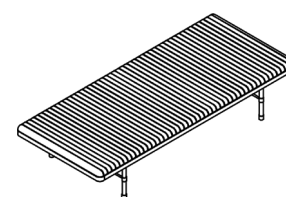

### Materials
