

LINN SK Stool

The LINN Table and Bench Set consists of a table and two benches, made of Corten steel or hot-dip galvanised steel. Woods used are oil-treated mahogany or Sature (silicate treated pine wood).

Corten's layer of rust protects steel against further corrosion. Alternatively frames are available powder-coated in any RAL colour of choice: all of the steel parts are anyway hot-dip galvanised before they are powder-coated, ensuring long-lasting performance in any type of weather.

Mahogany gives the set a warm, natural look; if treated with oil regularly will retain its warm colour, if left untreated the surface will gradually acquire a silvery-greyish patina. Product's durability in time will remain the same, despite treating wood with oil or not.

The table is also available with a 30x80cm hot plate which can be used as a base for BBQs, protecting the top from heat and scratches.

The concept behind design was to create a bench and a table with a very simple and very elegant look, clean and no frills design, adaptable to many different architectural contexts.

Several sets can be joined together in parks and outdoor areas, for a lovely cohesive look.

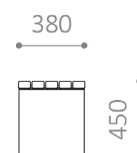

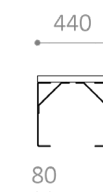

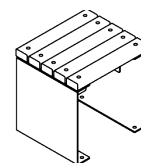

Materials

Frame: Corten steel or hot-dip galvanised steel; Powder-coated, hot-dip galvanised steel

Seat / Top: Sature (silicate treated, nordic pine wood); Oil-treated, FSC®-certified mahogany; Untreated FSC®-certified mahogany

Dimensions

L: 440mm
W: 380mm
H: 450mm
