

## MP Bench

The MP circular bench can redefine spaces and add a recreational feel. Has got a flexible shape for both use in play and seating. If you sit round the outside of the bench, you can follow the activity going on all around, while in the inner space you can turn your back and immerse yourself in a conversation or games.

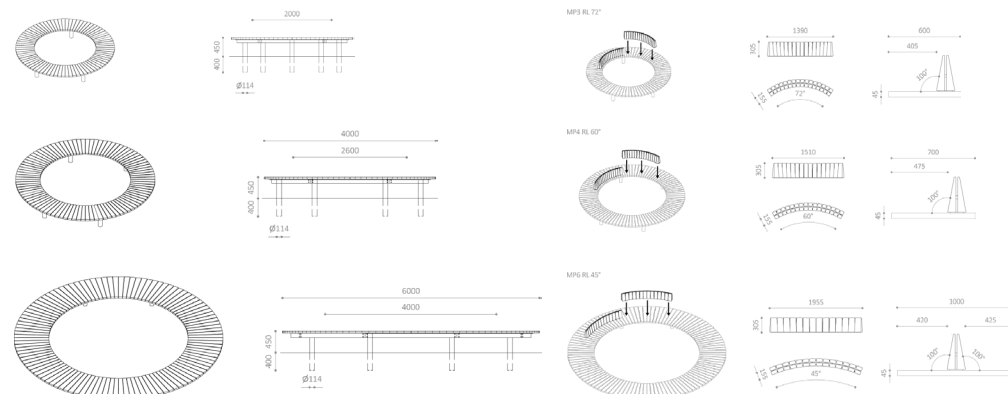

MP is available in three sizes of different diameters: MP3 (3200mm), MP4 (4000mm), and MP5 (6000mm). All sizes can be supplied with a back rest wedge shaped, designed to match curves of the bench. On MP3 and MP4, the back rest is placed on the inner curve of the circle; on MP6, there is room to sit on both sides of the back rest.

MP has been designed by MASU Planning, known for their innovative, distinctive style. Their solutions are strongly rooted in Nordic design traditions and a shared cultural history, using design to construct spatial narratives, robust, inclusive, and sensorial.

### Materials

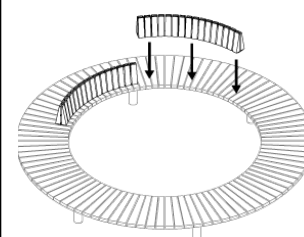

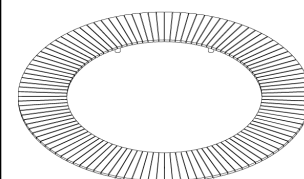

Frame: Hot-dip galvanised steel; Powder-coated, hot-dip galvanised steel
