

Environmental Policy Statement

Bailey Street Furniture Group and its associated companies (Bailey Streetscene Ltd, Artform Urban Furniture Ltd, AMV Playground Solutions Ltd and Street Furniture Direct Ltd) are fully committed to minimising potential negative impacts on the environment arising from the company's operations and this is an integral part of our overall business objectives and considered crucial to our continuing success. As a manufacturer, installer and procurer of street furniture from our supply chain, we ensure that our operations are fully compliant with the requirements of all relevant environmental legislation and current best practice and encourage the adoption of comparable standards by our suppliers and sub-contractors.

Setting Standards

We ensure that we establish standards and management procedures to meet them to comply with the requirements of all relevant environmental legislation and current best practice. By working to, and complying with, the requirements of ISO 14001:2015 we review and update our understanding of these requirements on a regular basis.

We ensure that the necessary resources are identified and allocated to implement the policy and the environmental management system fully and successfully.

We set regular objectives and targets to minimize our environmental impacts and ensure continual and measurable improvement in our environmental performance and throughout the Environmental Management System.

We have established, and maintain, procedures for minimising the potential occurrence of, and mitigating the impacts of, environmental incidents to prevent any pollution and nuisance.

We take environmental performance into account when selecting sub-contractors and suppliers and encourage our supply chain to meet our standards.

Objectives and Targets

Seek to reduce consumption of materials in all operations, reuse rather than dispose wherever possible, and promote recycling and the use of recycled materials. Where appropriate, take environmental issues into account when selecting or proposing the use of specific materials as consumables or as temporary or permanent works materials.

Aim to achieve energy efficiency in offices and the use of plant and vehicles.

Reduce, wherever practicable, the level of harmful emissions from any activity. Ensure that all waste materials are dealt with appropriately, in accordance with any Site Waste Management Plan, and in accordance with all legal and other requirements and ensure that records are kept to confirm this.

Responsibilities

Our Managing Director has overall responsibility for the environmental policy and the Sales Director is responsible for monitoring and operating the environmental policy. All personnel have responsibilities under the Company's environmental management system detailed in the companies operating procedures.

Communicating our Commitment

We ensure awareness of environmental issues within the company by training and by inclusion of them in operational management procedures. We ensure that all personnel are aware of the individual contribution they can make to the company's environmental performance.

We communicate on the environment with interested parties, including employees, clients and other contractors and, where relevant, local residents, and public authorities, through a spirit of open dialogue and proactive involvement with the aim of protecting the environment.

We publish this environmental policy in appropriate ways to confirm commitment to the activities included in it. Including issuing it to all employees, making it available to all suppliers and sub-contractors and by displaying it in the offices and making further copies available to anyone who requests one.

Reviewing our Performance

We monitor and audit environmental performance and performance against agreed measurable objectives and targets.

We review the policy, at least annually as part of the annual management review, and where necessary on an ad-hoc basis in response to any circumstances which would necessitate its review.
