

Parallel 42 Bench

Compatible, interchangeable modules elegantly form the building blocks for activating outdoor space.

Frame spaces, divide spaces, enliven spaces and spark social interactions—formal and informal, impromptu and planned. Parallel 42 creates settings around which complementary site elements support a variety of outdoor activities.

Parallel 42 gives designers the freedom to approach any site as a blank canvas, the power to determine how the furnishing interfaces with the environment. Right-hand, left-hand, straight and wedge modules can be specified to meet at 30° or 45° angles, and include the option for backs and centre arms that act as skate deterrents. The backs are substantial coined steel attached to the benches with no visible fasteners. They can be specified with a straight, left angle, right angle, or chamfered orientation. Parallel 42 is available in Ipe, Jarrah or DSTMA wood, with powdercoated metal in a wide variety of colours.

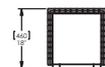

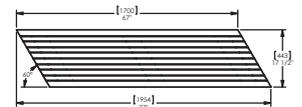

Specification

Materials

Bench - timber
Ends - powder coated steel

Dimensions

H: 460mm
W: 1700 / 1954mm
D: 443mm
