

Anastasio-Makatite-Realgar Benches

Monolithic flat bench made out of reconstituted marblestone or granite. The bench is supplied with reinforced bushes for lifting and simple positioning on the ground. Upon request the bench can be supplied with a backrest in exotic wood. When combined these three elements can create simple yet stunning seating arrangements, which can also act as a retaining system to raised soft landscaping schemes.

Collection of modular benches in PDM (Reconstituted Stones), available in three versions:

Anastasio

Makatite

Realgar

- **Anastasio** is a monolithic seat with inclined sides and optional backrests.
- **Makatite** is a monolithic seat, equipped with a cast in reconstituted stone backrest.
- **Realgar** is a monolithic seat, equipped with a cast in reconstituted stone footplate.

The benches can be installed individually or in composition.

Anastasio can also be supplied with a backrest made of laser cut steel sheet with geometric patterns, available in linear or inclined version, depending on the side of its position on the monolith, or in wood with steel tube support brackets.

The significant weight of the bench means it does not need fixing and is freestanding.

Materials

Seat - PDM (Reconstituted Stones)

Integral Backrest - PDM (Reconstituted Stones)

Optional Backrest - timber / powder coated steel

Dimensions:

H: 450mm

W: 2000mm

D: 556mm

Weight: 1020 / 1500kg
