

Apollo Cycle Stand

The Apollo Cycle Stand, can be used as a pedestrian bollard, is manufactured from extruded aluminium. From the front, fixed on both sides is a shaped steel plate, upon which it is possible to add aesthetical timber, stainless steel or RAL colour coated plates. A 3mm laser shaped cap finishes off the top of the structure. All metal parts are cold galvanised and polyester powder coated. Fixings are stainless steel.

Specification:

Materials:

Bollard - extruded aluminium.

Reinforced insert - steel.

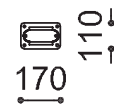

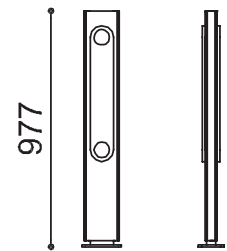

Plate - timber, stainless steel, powder coated steel, bespoke option.

Fixing:

Ground fixing is through base plates with steel ground anchors. All fixings are stainless steel.
