

## Cochran Chair

The Cochran side chair with arms is designed for relaxing, socialising and sitting comfortably with a phone or laptop. Designed to be wider than the typical chair, it feels generous and expansive. Like the lounge, the Cochran chair is engineered to meet the demands of high-use commercial environments. Its strong sculpted, continuous-loop cast frame supports a cast aluminium rail that stretches and holds the seating fabric and is secured to the frame with discreet connections. The fabric is Phifertex Plus, a nylon weave that has been designed and engineered for a wide variety of applications that demand extra strength and dimensional stability. Phifertex Plus is highly durable, easy to clean, stain and fade resistant. The fabric and rail assembly is replaceable.

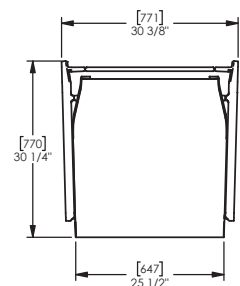

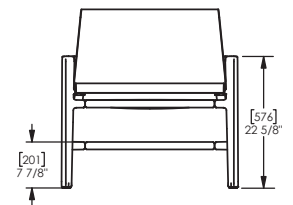

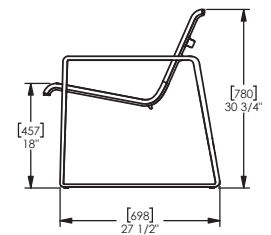

### Specification:

#### Materials:

Frame - aluminium  
Seat - phifertex plus nylon

### Dimensions

H: 780mm  
W: 771mm  
D: 770mm
