

Cochran Lounger

The Cochran lounge is a wide and comfortable armless seating element that supports users with cache, whether basking in the sun, reading a book or working on a laptop. Engineered for today's high use commercial environments, the lounge's strong sculpted continuous-loop cast frame supports a cast aluminium rail that stretches and holds the seating fabric and is secured to the frame with discreet connections. A fabric self edge provides a trim border and a 6mm reveal between the structural frame and fabric rail lends the lounge a floating quality. The fabric is Phifertex Plus, a nylon weave that has been designed and engineered for a wide variety of applications that demand extra strength and dimensional stability. Phifertex Plus is highly durable, easy to clean and mildew, stain and fade resistant. The fabric and rail assembly is replaceable.

Specification:

Materials:

Frame - aluminium

Seat - phifertex plus nylon

Dimensions

H: 849mm
W: 762mm
D: 1644mm
