

Cosmos Information Post

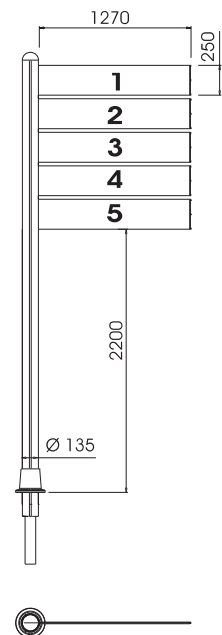

The Cosmos Information Post is manufactured to a length of 92mm or 135mm from extruded aluminium. the post measures 3160mm or 3679mm high (above ground) and is reinforced with a 50mm or 90mm tubular steel insert, with its thickness dependent on the geographic area. The base and end cap are constructed from galvanised steel sheet and is polyester powder coated. The information post can be composed of one or two posts and a variable number of signs, up to a maximum of five units. All fixings are stainless steel.

Specification

Materials
Post - aluminium
