

Eccentrica Planter

The Eccentrica Planter lives by its name by being commanding in its design and shape. This planter is shaped like a truncated inverted cone, manufactured entirely out of steel sheet. Its softly curved inverted cone profile, offers a distinctive, contemporary design for both public and private spaces. At the base of the planter is a circular base with fixings to regulate its slant. Each planter can be accessorised with two stainless steel plates which can be used to attach name-plates or labels.
