

FGP Pedestrian Light

The FGP LED pedestrian light has a pleasing flower-like organic form created by three stems that rise from the connection with the pole. The head of the light holds LEDs in triangular arrays that cast illumination between the verticals in a clean footprint. The FGP pedestrian light is ideal for campuses, parks and plazas, helping to create public spaces that are usable 24 hours a day. LED light sources are energy efficient and all castings are powder coated.

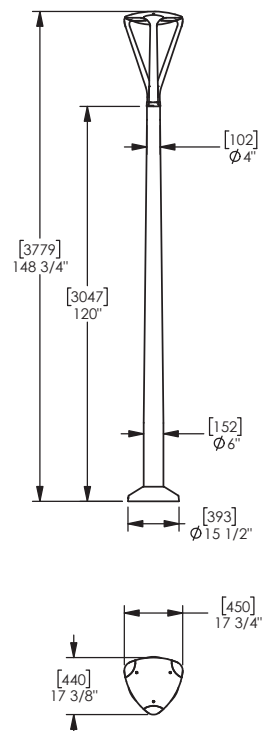

Specification

Materials

Post - cast aluminium

Dimensions

H: 3779/4800mm
W: 152mm
D: 152mm
