

Garda Shelter

Garda is a modular bike hub composed of steel tube structure and expanded metal sheet covering panels. The hub is equipped with a door, whose closure is protected by a customisable access control system.

A variety of options are available to accommodate a range of cycle parking and environmental needs.

Roof: Galvanised corrugated steel or Green roof

Floor: Concrete slabs, WPC boards, or Existing floor.

Cladding: Standard metal sheet panel or Decorated metal sheet Panel

Locking options: Card, Numeric Keypad, Key Lock

Cycle Parking: Racks, Vertical racks, Helmet Lockers, Electric Charging Bar

The structure is always equipped with LED lighting.
