

Libre Seat

The seat consists of a hot galvanised and polyester powder coated steel structure, composed of three thick shaped sheet steel supports linked to a robust horizontal steel tube bar which also connects to the seat formed from drawn steel tube sections. The polyester powder coated cast aluminium supports, which can be supplied with various positioning and ground fixing kits, are fixed to the bar with special coated cast aluminium clamps. Alternatively hot galvanised and polyester powder coated tubular steel supports are available for concreting into the ground.

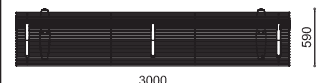

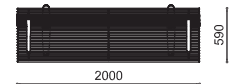

Specification:

Materials:

Seat - powder coated steel

Dimensions

H: 814mm
W: 1700/2000/3000mm
D: 590mm
