

Libre Settore Seat

The Libre Settore Seat is composed of four thick sheet steel supports linked together by a robust curved steel tube bar. The sandblasted, zinc primer and polyester powder coated cast iron supports can be supplied with various positioning and ground-fixing kits. These are fixed to the bar with special coated cast aluminium clamps. Alternatively the seat is available with a hot dip galvanised and polyester powder coated steel supports to be installed into concrete foundations and fixed to the bar with the same aluminium clamps. All fixings are stainless steel.

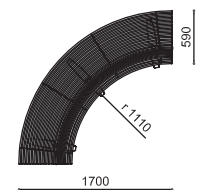

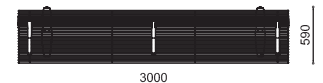

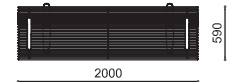

Specification:

Materials:

Seat - powder coated steel
