

Loop Up

Functional bollard for sitting and jumping – perfect for green areas, playground or schoolyard. Use for group gatherings, with or without distance, and create a positive and dynamic environment. Can be combined with any other product from our Loop family.

Small, inverted conical toadstools stick out from the ground and invite for stay and play. Aart Designers created a soft, round shaped Loop Up as a complement to the rest of Loop family. Loop Up can be used together with the Loop Picnic or as a stand-alone item.

Specification:

Materials:
