

My Beast

Great design is revealed when obsessive attention to detail is present, and when it came to designing MyBeast there was nothing left to chance.

The core structure is made using an innovative material in order to achieve solidity and strength properties of concrete, together with the resistance and tensile strength of steel.

Each stainless steel accessory has been hand-polished to make it flawless to touch.

All the manufacturing is performed in Italy, benefiting from substantial industrial expertise and a craftsmanship-grade quality.

To help create a more immersive training experience the MyBeast has been enhanced with proximity-based technologies and incorporated top fitness trainers to develop specific exercises for each Stage.

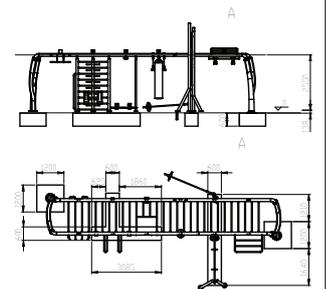

Specification:

Materials:

Frame - stainless steel; ultra high performance concrete (UHPC)

Dimensions

H: 2550mm
W: 11479mm
D: 4050mm

(Technical Drawings for variants available on request)
