

## Presidio Bench

The Presidio Bench was designed by Brian Kane to meet the rigorous demands of unsecured public spaces while keeping the focus on the surrounding environment. The Presidio bench is visually strong but aesthetically pleasing. It is tough, fail-safe, graffiti-resistant and also remarkably refined. It is manufactured from rugged steel tubing and rods but bears the unmistakable mark of craft. It is simple in its vocabulary of elements, diversified in its possibilities, elegant in its form and presence.

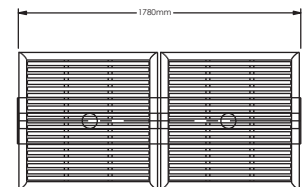

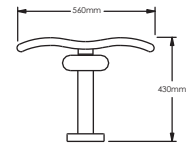

### Specification:

#### Materials:

Bench - powder coated steel

### Dimensions

H: 430mm  
W: 1780mm  
D: 560mm
