

Profile Light

Designed in collaboration with award-winning lighting designer Linnaea Tillett and Tillett Lighting Design Associates, the Profile family of lights creates beautiful and intentional light emanating from a refined, minimalist design. Shadows from Profile's I-beam channels and modular column design build a light experience like no other, creating poetry between the sculptural form and the play of light upon the object and its surroundings.

Accent Lights are available in a full colour palette and finished with proprietary Pangard II® HAPS, VOC, and lead-free polyester powdercoat.

Profile Accent Light

The Profile Accent Light targets discrete areas with a soft wash of light. Further tailor the Accent Light's performance and aesthetic with optional grazing and foot lights. Profile Accent Lights have optional colour temperatures, standard output, diffused lens, and optional twist lock receptacle.

Profile Area Light

The Profile Area Light has a single- or dual-mounted luminaire mounted at the top of an I-beam column. Further tailor the Area Light's performance and aesthetic with optional grazing or foot lights. Profile Area Lights are available in optional colour temperatures and with Type 2, Type 3, and Type 4 distributions, standard and high output, clear or diffused lens, and optional twist lock receptacle.

Profile Column Light

The Profile Column Light casts a wash of light down the recessed channel of the light's I-beam column. Further tailor the Column Light's aesthetic with optional foot lights. Profile Column Lights have optional colour temperatures, standard output, and optional twist lock receptacle.

Dimensions:

H: 3100mm, 3700mm, 4300mm, or 4900mm

The 3100mm high unit can be specified with 622mm-high add-on sections
