

Rainless Litter Bin

The Rainless Stainless Steel litter bin is cylindrical in shape, equipped with an opening cover, complete with a patented system.

This system minimises entry of rainwater into the container. Only 3.2% of rainwater enters the internal liner, favouring instead the collection and treatment of litter. The litter bin is available in various versions.

Specification:

Materials:

Galvanised and powder coated steel. Corten steel. Stainless steel.

Fixings:

Pre-drilled for anchors.

Dimensions

H: 905mm
Dia: 520mm
