

Spring F Drinking Fountain

The Spring F Drinking Fountain is an elliptical shaped fountain made of Ultra High Performance Concrete (UHPC) with ALFA finish. The nickel-plated brass valve is of the button type with return spring. The column is fixed to the base of the steel tank and features a drain and overflow pipe. The stainless steel drain is removable for easier tank cleaning.

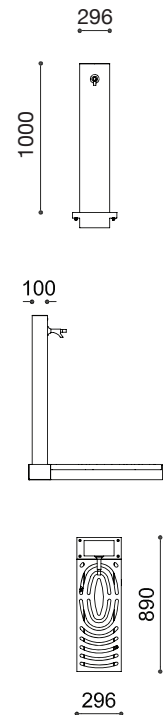

Specification:

Materials:

Post - stainless steel, UHPC

Dimensions

H: 1000mm
W: 296mm
D: 100mm
