

Take Out

Designed by Rodrigo Torres, Take-Out expands on the connected seating concept with refined lines and improved versatility. Take-Out's minimalist form is designed to maximize its function, comfort and accessibility. Light enough to be picked up, arranged and rearranged, Take-Out opens up new ways for people to connect in outdoor spaces—face-to-face or abreast, an intimate chat or a large group gathering.

Featuring five different silhouettes—a single, double, triple, left triple and right triple —can either stand alone or work together in myriad arrangements.

Take-Out is about bringing people together in ways that accurately reflect the character of the occasion.
