

## Topazio Recycling Bin

The Topazio Recycling Bin is manufactured from binding compound granite or coloured marble aggregate to create the body of the recycling bin. The cast aluminium cover is fixed directly onto bushes and embedded in the compound.

The cover can be painted in four colours to facilitate the collection of different types of waste, or in one colour for regular waste management.

The litter bin is also supplied with a galvanised and powder coated steel ashtray, with a stainless steel anti-theft cable.

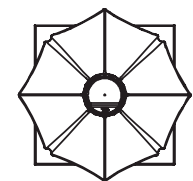

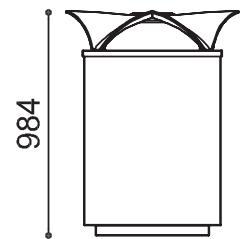

### Specification:

#### Materials:

Body - reconstituted granite or marble  
 Top - cast aluminium  
 Ashtray - powder coated steel

### Dimensions

H: 984mm  
 W: 761mm  
 D: 761mm
