

6Concrete Bench

This robust variant of the original Union Bench juxtaposes the strength of concrete with organic, undulating forms. It withstands climates around the globe and its assortment of sizes makes it perfect for placement in parks, streets, squares and gardens. Weighing at 1300 kg, the power of the outdoor Union Bench in concrete gives it a strong value, particularly for landscape designers looking for outdoor furniture that will last. Its comfortable, refined design combines a spherical concrete base with smooth, circular wood seating.

The simple, stylish design fits well in any setting, lending a futuristic yet classic, harmonious touch.
