HARDWOOD WITH PIGMENT IMPREANATION

VARNISHED OKUME PLYWOOD

VARNISHED OKUME

For our hardwood and larch wood products we use a water-based pigmented impregnation treatment, but, if required by the client, wood can be left natural.

Okumé wood products are always supplied with water-based varnishing.

Larch wood we use is always FSC certified, for other wood essences this certification is on request.

## WPC (Wood Polymer Composite)

WPC PLUS

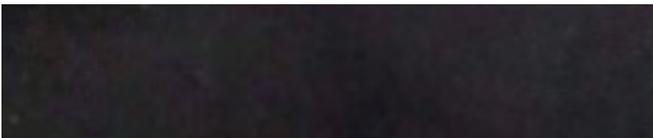

WPC ULTRA

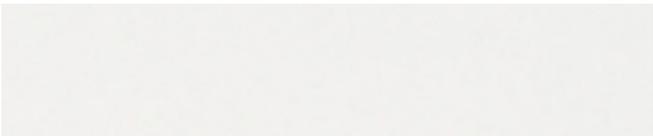

We selected two different types of WPC (Wood Polymer Composite) for our products, ULTRA and PLUS. They do not have to be considered as alternatives, because the choice depends on the technical features of each design
