

Big Harris Bench

The Big Harris Bench is made up of two or three 7mm thick steel sheet supports, hot dip galvanised with a predrilled base plate for ground fixing with bolts (not supplied). The bench is made up of five 138x38mm section timber slats, with a double-sided outer strip in the chosen timber which is fixed to the supports with countersunk screws and reinforced with pre-zinc steel brackets. All timber parts are double coated: the first coat is a base insulating spray and the second finishing coat is a water-based varnish for outdoor use. All steel components are polyester powder coated. Big Harris Bench is also available with corten steel legs.

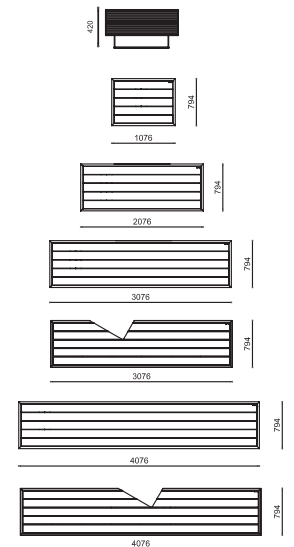

Specification:

Materials:

Frame - powder coated steel; corten steel
Seat - timber

Dimensions

H: 420mm
W: 1076 - 4076mm
D: 794mm
