

## Connect Shelter

The Connect shelter features an elegant and mobius frame which creates a continuous, flowing outline for the light and airy glass-roofed and glass-sided structure. Optional glass panels for the back and front address specific site requirements and climate conditions. Glass sides and roof panels are standard stationary elements.

### Specification:

#### Materials:

Main Structure - case aluminium  
Roof - glass

#### Finishes:

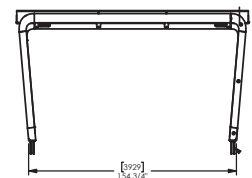

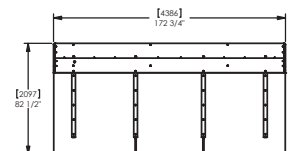

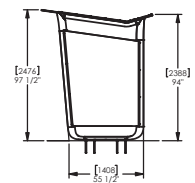

Pangard II powder coated

#### Fixings:

Surface mounted with base plates

### Dimensions

H: 2476mm  
W: 3100, 4386mm  
D: 2097mm
