

Cyprus Seat

The Cyprus Seat is available with or without a backrest. The seat is made up of a hot zinc and polyester powder coated steel frame, consisting of two steel plate supports connected to a 60x60mm bar, to a pair of concrete supports. The timber is double-coated: the first coat is a base insulating spray and the second finishing coat is a water-based varnish for outdoor use. In the middle, the seat slats are reinforced by suitable supports in galvanised and coated shaped steel sheet. The concrete bases are fixed to the frame by 2 precast aluminium attachments. All fixings are stainless steel.

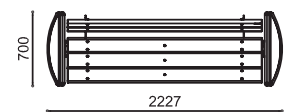

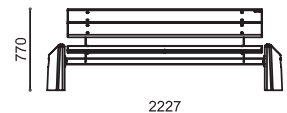

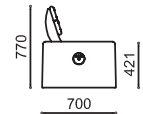

Specification:

Materials:

Frame - concrete; powder coated steel
 Seat - timber

Dimensions

H: 770mm
 W: 2227mm
 D: 700mm
