

Moonstone Seat

The Moonstone Bench is a free-form monolithic element, made using a binding compound or marble aggregate which is either sanded or polished. On request a circular timber bench can be supplied, anchored directly to the stone with galvanised steel brackets. The element is equipped for ground fixing by concreting-in the levelling base. Sub-surface fixed.

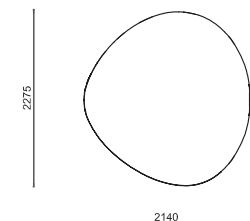

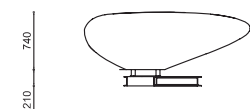

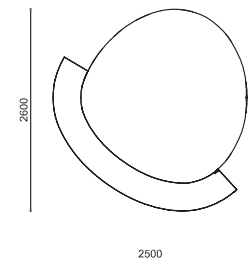

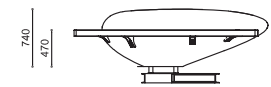

Specification:

Materials:

Bench - marblestone / granite; timber

Dimensions

H: 740mm
W: 2500mm
D: 2600mm
