

## Ride Cycle Stand

The Ride cycle stand features concealed connections and discreet leveling glides to make the stand appear balanced in air. The cast aluminium flat ribbon frame marks it as a member of the Metro40 family. The Ride can be surface mounted or embedded. The stand must be spaced 762mm apart, and 610mm from any wall. It provides great bicycle support with the capability for attachment at two points and holds two bicycles. A cover plate over the bike rack base creates a seamless appearance. Aluminium casting finished with Pangard II powder coated, offered in selection of colours.

### Specification:

**Materials:**  
Aluminium.
