

Halls Litter Bin

The Halls Litter Bin consists of a cylindrical structure which is made up of a fixed semi-circular back and a semi-circular door in zined sheet which features sheet dome cover. The opening door, with triangular key slam lock, allows the easy removal of the 90 litre liner, complete with comfortable handles for lifting. The ground base is in sand-blasted concrete allowing ground fixing with suitable M10 bolts. Upon request, it is possible to supply the cover with a circular ashtray with anti-theft cable. All metal components are polyester powder coated. All fixings are stainless steel.

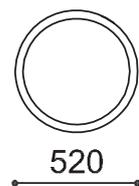

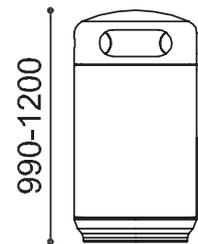

Specification:
