

Horn Bench

The Horn Bench is made from a pair of polyester powder coated cast aluminium supports and a seat manufactured from timber slats. The bench can be supplied with a timber backrest in the same type as the bench with supports in hot zined and polyester powder coated steel plate. The timber is double coated: the first coat is a base insulating spray and the second finishing coat is a water-based varnish for outdoor use. The supports can be used to show advertising boards. The supports are supplied with lower threaded bushes for installation with ground anchors into concrete foundations, or with suitable bolt accessories.

Specification:

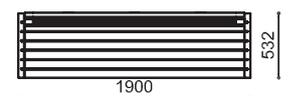

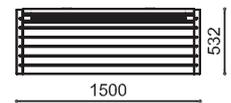

Materials:

Frame - powder coated steel; cast aluminium

Seat - timber

Dimensions

H: 775mm
W: 1500 / 1900mm
D: 532mm
