

Ideas T Bench

The Ideas T Bench is made up of a solid, double T-shaped, monolithic support, in 8mm thick corten steel and a hot galvanised steel lower base support. The seat is made up of ten timber slats fixed by finger joints across a stainless steel tube with two turned threaded components which welded at the ends. These are closed off with screwed on antitheft ends. A number of round nylon elements act as spacers between the timber beams. The corten steel is sandblasted and treated with a unique oxidisation cycle.

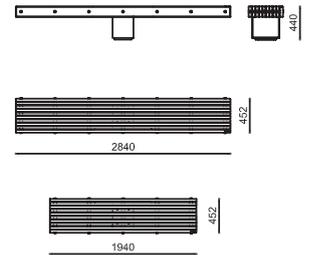

Specification:

Materials:

Frame - corten steel
Seat - timber

Dimensions

H: 440mm
W: 1940/2840mm
D: 452mm
