

Cortomadere Seat

The Cortomadere seat proposes a new style of city living. This piece of street furniture naturally brings together corten steel and timber, which offers new solutions and applications which reinvent natural urban spaces. The Cortomadere offers a range of seating options, a single seat and multiple seats, both with or without a backrest, and a chaise longue. The structure is made from a single piece of purposefully shaped, laser cut sheet steel. The frame can be equipped with a single seat and backrest coverings, either in timber or stone. We offer a range of stone options to provide a modern look. The clean line and use of different materials gives the seat elegance and originality to compliment various settings.

Specification
