

Reeder Monolith Wayfinder

The Reeder Monolith Wayfinder is angular in shape and slim in profile. It is made up of a cast and extruded aluminium base with integrated LED up lighting, topped by a glass signage panel. The glass panel, which sits neatly into a groove in the base, is wear and impact-resistant tempered low-iron glass. Panels can be custom etched with logos and messaging provided by the user. LED lighting is hardwired. The cast and extruded aluminium base is powder coated with all standard colour palette options.

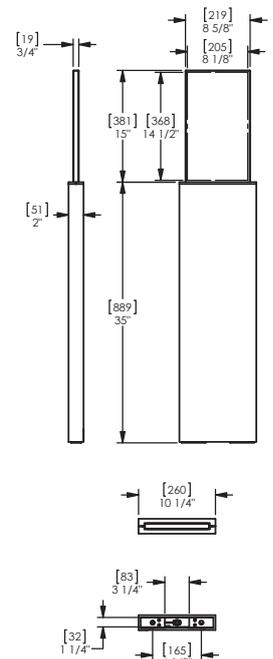

Specification

Materials

Body - aluminium
Top - glass
