

Cochran Side Table

The Cochran Side Table beautifully complements the lounge and chair. A 6mm reveal between the structural frame and tabletop echoes that on the lounge and chair, giving the piece a floating quality. Cochran tables can be used singly or grouped effectively to create sociable settings. Like all Cochran elements they are designed for portability and service in today's high-use commercial environments. The 4-legged cast aluminium frame supports a handsome top made of Landscape Forms proprietary Meldstone ultra high-performance cast concrete, a natural material with an elegant polished finish.

Specification:

Materials:

Frame - aluminium

Seat - phifertex plus nylon
