

Morrison Table

The Morrison Table is a staple product within the Terrace Life range which helps make memorable moments happen on terraces, patios, roof gardens and other private and protected social settings. Designed by renowned modernist architect Lionel Morrison, an elegant high table with stools and a sybaritic wide, low bench provide new ways of connecting and a welcoming ambience in special social spaces. Floating frames create a form language and panel inserts in a choice of glass, steel, concrete or timber provide texture and tone. Seamless connections and flawless finishes are the essence of finesse.
