

Cube Bollard

The Cube Bollard is made entirely out of 25/10mm stainless steel sheet and comes with a square supporting base in 3mm thick brushed stainless steel. The shape and dimensions of the bollard gives it dual-purpose as a bollard and a seat. The Cube Bollard is also available in Corten Steel or Mild Steel powder coated. All fixings are stainless steel. The bollard can be supplied filled with concrete for extra security.
